

COLOR PIGMENT SETS

EcoPoxy epoxy concentrated pigment consist of pigments suspended in epoxy resin which allows them to blend thoroughly into epoxy resins to make very uniform colors. They are used to tint epoxy resins used as coatings, paints, gel coats, laminating, casting or self-leveling resins. The high tinting properties enable the use of little quantities of pigment. The quantity to be used depends on the color chosen as some colors cover better than other (yellows for example need higher quantities than other colors).

ECOPOXY color pigments come in a variety of colors and mix easily.

ECOPOXY Color Pigment Benefits:

- Mixes easily
- Can be mixed together to develop custom colors
- Non Toxic
- Low odor
